POWER TO THE CORPORATIONS

Faceless giant corporations suing our government. The NHS getting carved up by more and more private companies. British taxpayers being taken to the cleaners by Coca-Cola, Starbucks, and any other mega-company that doesn't like how 'strict' our laws are.

This might sound far-fetched, but it's a few handshakes and signatures away from becoming a reality. Right now, a huge new trade deal is being negotiated between the US and the EU: the Transatlantic Trade and Investment Partnership – or TTIP for short.

It's a fancy name for a sinister deal. It'll open the door for US healthcare companies to sue our government if they try to put a stop to privatisation of the NHS. And it'll allow big businesses to sue the government if it passes laws that damage their profits – like raising the minimum wage, or introducing plain packaged cigarettes.

TTIP takes power away from ordinary people and puts it into the hands of corporations.

**TTIP WOULD BE TERRIBLE FOR OUR COUNTRY.
WE NEED TO STOP IT HAPPENING - TOGETHER.**
