Assessments that ask students to perform real-world tasks that demonstrate meaningful application of essential knowledge and skills.

Featuring both presentations and hands-on activities, the workshop presenters will:

- Discuss the important role assessments play in promoting deep learning and transfer;
- Highlight the differences between authentic assessments and assessments that target lower-order thinking skills;
- Explore strategies for designing and implementing authentic assessments for a variety of class sizes.

Participants will gain hands-on experience with using tools and resources for developing and evaluating authentic assessments.
