

Torin™ Commercial Air-to-Water Heat Pump Water Heater

Engineered to Endure. Trusted to Perform.

Built to meet today's commercial hot water demands, Torin™ delivers high efficiency, sustainable performance, and dependable cold-climate operation—paired with a space-saving design well suited for tight mechanical rooms and retrofit applications. As the only solution in its class proven to deliver hot water at lower ambient temperatures, Torin™ gives businesses confidence their hot water needs will be met, wherever reliability matters most.

Key Benefits

- **Performs in extreme conditions**—operates efficiently in ambient temperatures as low as -13°F (-25°C).
- **Achieves COP up to 4.5**, reducing energy costs significantly.
- **Energy Star® Certified** for compliance and rebates.
- **Its compact design delivers a leading footprint**—on average 36% smaller than major competitors. *(Based on overall unit footprint compared to the average of comparable models using published specifications.)*
- **Sky-35 touchscreen interface** for easy setup and monitoring. Simplifying operation for installers and facility operators.
- **Indoor/outdoor ready** with single or multipass piping options to fit a wide range of system designs.
- **Cascade up to 16 units** for redundancy and higher capacity.
- **Engineered for a wide range of applications** — this system delivers reliable domestic hot water and space heating.

Ideal Applications

- **Hotels & Hospitality** - High Demand
- **Schools & Universities** - Campus Wide
- **Government & Office Buildings** - Energy-focused
- **Multifamily Housing** - Retrofit-Ready
