XTherm – Modulating Condensing Boiler Thermal Efficiencies

Raypak has taken the time proven XTherm® design to the next level with the all new “A” model XTherm®. Now available with the new fully integrate Versa IC™ control system and near double the original turndown ratio, now 7:1, the XTherm® is even better than before.

The XTherm® is CSA-certified at 96% efficiency as a boiler at full fire. At low fire the XTherm operates at up to 99% with 50F inlet water temperature. The XTherm is able to maintain 88% at all firing rates when operating in a non-condensing mode with inlet water temperatures up to 150F.

(Data from XTherm operating under typical installed operating conditions)
