

## **List of auditors approved to validate and verify projects against the Climate, Community & Biodiversity (CCB) Standards**

**Updated April 21, 2014**

### **Requirements for eligibility:**

CCB validations and verifications must be performed by an experienced and respected environmental auditing company with one of the following qualifications:

- Accreditation as a “designated Operational Entity” for the sectoral scope “Afforestation and Reforestation” or “Agriculture” with the CDM Executive Board (the sectoral scope that the auditor is accredited shall match the type of project undergoing validation or verification);
- Accreditation as a Certification Body for sustainable forest management audits under the Forest Stewardship Council (FSC) in the geographical area of the project to be evaluated; *or*
- Accreditation under ISO 14065:2007 with an accreditation scope specifically for the Verified Carbon Standard (VCS) Program covering Agriculture, Forestry or Other Land Use.

The company and its staff that work on the CCB validation/verification of the project must be completely independent of all other aspects of the project and not have previously assisted in its design or worked on any of its components.

## List of auditors approved to validate projects against the CCB Standards

Auditors are listed in alphabetical order

| Company                                  | Contact                       | Email                                                                                      | Accreditation | Website                                                                               | Address                                                                                                    | Telephone                                     |
