Statement of CCB Standards Validation

April Salumei Sustainable Forest Management Project

Validation Scope

The SCS Greenhouse Gas Verification Program has conducted a validation of the April Salumei Sustainable Forest Management Project in Papua New Guinea against the requirements of the Climate Community Biodiversity (CCB) Project Design Standards, Version 2.0 (December 2008). SCS conducted both desk and field based assessment activities in its evaluation of the project. SCS used the Project Design Document supplied by Rainforest Project Management Limited as the basis for its evaluation.

Validation Opinion

Based on the results of our validation activities, it is our opinion that the project meets the quality standard defined by CCBA. The April Salumei Sustainable Forest Management Project conforms to the 14 Required CCB Criteria. The project also conforms to a total of 1 of the Optional CCB Criterion qualifying the project for Gold Level in the Biodiversity category.

Certification Date: June 13, 2011
