

Statement of CCB Standards Compliance

Biocorredor Martin Sagrado REDD+ Project

Validation Scope:

The SCS Greenhouse Gas Verification Program has conducted a validation of the Biocorredor Martin Sagrado REDD+ Project developed by PUR Projet against the requirements of the Climate Community Biodiversity Alliance (CCBA) Project Design Standards, Version 2.0 (December 2008). SCS conducted both desk and field based assessment activities in its evaluation of the project. SCS used the Project Design Document supplied by PUR Projet as the basis for its evaluation.

Validation Opinion:

Based on the results of our validation activities, it is our opinion that the project meets the quality standard defined by CCBA. The Biocorredor Martin Sagrado REDD+ Project conforms to the 14 Required CCB Criteria. The project also conforms to the optional Climate Change Adaptation, Community, and Biodiversity CCB Criteria, qualifying the project for Gold Level.

Certificate # SCS-GHG-000025

Date: 2.25.2013

Expiration Date: 2.24.2018

Project Location: Biocorredor Martin Sagrado, Peru
