

ENVIRONMENTAL SERVICES, INC.

Verification Statement Climate, Community and Biodiversity Project Design Standards (Second Edition – December 2008)

CarbonCo, LLC – Purus Project – A Tropical Forest Conservation Project in Acre, Brazil

Issuance Date: 15 October 2014
Project No. VO13022.01

This verification statement confirms that Environmental Services, Inc. (Climate, Community & Biodiversity Alliance-Approved Validator) has evaluated the implementation of the Project Design Document prepared by CarbonCo, LLC (Project Developer) for the 2013 – Purus Project Monitoring Report dated 6 October 2014, according to the criteria outlined by the Climate, Community and Biodiversity Project Design Standards (Second Edition- December 2008) and that this verification statement is consistent with ISO 14064-3:2006 and ISO 14065:2007. This CCB project verification applies to the Purus Project – A Tropical Forest Conservation Project in located along the Purus River in Acre, Brazil. The Purus Project has successfully achieved net positive climate, community and biodiversity benefits including, but are not limited to: a reduction in the Project Area's deforestation; preservation of biologically diverse habitats; local hires and transfer of technical knowledge; and the overall development of the first-ever, VCS-CCBS validated REDD+ project in the State of Acre, Brazil. The dates of the period evaluated for this verification are 1 January 2013 to 31 December 2013.

Environmental Services, Inc. confirms all verification activities including objectives, scope, criteria, level of assurance, project description implementation, stakeholder interviews, monitoring report, and project implementation report adherence to the CCB Project Design Standards as documented in our report entitled *Climate, Community & Biodiversity Alliance Project Design Standards, Purus Project Verification Report*, dated 15 October 2014 are complete and concludes without any qualifications or limiting conditions that the *Purus Project – A Tropical Forest Conservation Project in Acre, Brazil* is without material discrepancy and that the verification activities provide a reasonable level of assurance. The 2013 – Purus Project Monitoring Report dated 6 October 2014 meets the requirements of the Climate, Community and Biodiversity Project Design Standards (Second Edition – December 2008) and produces net climate (60,563tCO_{2e}), community, and biodiversity benefits. The project also achieved Gold Level for Exceptional Biodiversity Benefits.
