MERCHANDISE

Although many selections for caskets/alternative containers may look alike at first glance, differences in materials, craftsmanship, and design features can affect both appearance and function. The information below is intended to assist families in understanding their options as they consider their selection.

Sealed (Gasketed) Caskets

Some caskets are made with a protective sealing feature designed to provide an added layer of protection from outside elements such as air and moisture. These caskets may be crafted from materials like steel, copper, or bronze in varying strengths and finishes.

Non-Sealed (Non-Gasketed) Caskets

Other caskets do not include a sealing feature and are not designed to prevent the entry of outside elements (non-protective). These options may be made from metal, solid wood, or engineered wood products and may include veneer or fabric interiors. A complete selection of available caskets will be shared with you along with our General Price List below.
