In most areas of the country, state and local law does not require that you buy a container to surround the casket in the grave. However, many cemeteries require that you have such a container so that the grave will not sink in. Either a grave liner (concrete box) or a burial vault will satisfy these requirements. These prices are for the standard size outer burial containers, a smaller or larger container, will be priced accordingly. These burial vaults may vary in color and finish. The only warranties, expressed or implied, granted, in connection with this funeral service are the expressed written warranties, if any, extended the manufacturer thereof. No other warranties of merchandising fitness for a particular product are extended by the seller. Please see the warranty for details, descriptions, and limitations. Please see the manufacturers warranty for details, descriptions, and limitations. *which is in addition to the cost of the vault: Archdiocese of Newark-\$110; Glendale-\$100; Hillside, Lyndhurst \$50.00; Immaculate Conception, Montclair-\$35*

DORIC VAULTS OFFER PROTECTION & SECURITY

Graves are no longer opened by hand with a shovel. Today, the backhoe is the choice for most grave openings. Did you know that the average backhoe weighs in excess of six tons. This weight, the daily grind of cemetery equipment and the constant forces of the soil pressure reinforces the need for protection. Doric understands your concerns. To combat these forces, Doric manufactures one of the

strongest lined concrete burial vaults in the industry today. Doric vaults are lined with our exclusive plastic liners which are manufactured in our own facility under the watchful eye of Doric craftsmen to ensure every liner is consistent in quality and strength. The cover, where the forces are the greatest, are steel reinforced for added protection to an already premium vault.

THE ANATOMY OF A DORIC LINED CONCRETE VAULT

Decorative capcase for added strength that features personalized nameplate & emblem
Steel reinforced lid and vault for added strength
Inner liner of tough ABS Fiberglass "Lucra-Seal" or Duraprene™ firmly bonds to the reinforced concrete base and lid

Doric's Integra-Seal® forms an extra barrier from moisture after the vault is sealed
Exterior of vault has a hand-applied water resistant coating

The Strength of Doric

All Doric manufacturing plants are certified by the National Concrete Burial Vault Association.
