PACKAGE SELECTIONS FOR "GREEN" DISPOSITION

These packages do not include merchandise, taxes, or cash advance items.

ALKALINE-HYDROLYSIS:

\$2,795

Includes basic services of funeral director and staff; transfer of remains to funeral home; refrigeration (up to 5 days); and Alkaline-Hydrolysis fee.

An alternative to flame cremation, Alkaline-Hydrolysis is a water-based process that returns the same result ("ashes") but at a fraction of the carbon footprint. You may add any of the traditional funeral options to this package such as a visitation, reception, or funeral / memorial service.

NATURAL ORGANIC REDUCTION:

\$5,495

Includes basic services of funeral director and staff; transfer of remains to funeral home; refrigeration (up to 5 days); transfer of remains to the Natural Organic Reduction facility; and the Natural Organic Reduction fee.

Natural Organic Reduction (aka "Terramation") utilizes the body's own naturally occurring microbes to gently transform remains into nutrient rich soil. The process is conducted in individual pods and takes about 60 days to complete. The resulting soil can then be returned home to be planted with a memorial tree or donated to forestry or other similar nature rejuvenation projects.

One limitation to consider is that due to the requirement of a body to be in an as natural of a state as possible, we are unable to embalm the remains which precludes us from offering public viewings or visitations when Natural Organic Reduction is selected for disposition.

Please refer to our General Price List for complete information.

These prices are effective as of August 1, 2021. They are subject to change without notice.
