**Mowing Season**

*by Damon Melcho*

Memorial Day has come and gone and we are now in the heart of our mowing season. There are a couple things that you need to know.

As per our "Decoration Guidelines", all grave decorations must be in an approved cemetery bronze vase. This will help to insure that we can mow without risk of picking up wire or other debris, which can cause damage to the mower blades.

However, should you have a special request or anniversary date (like a birthday or day of death) in which you would like to do something special with the gravesite, just come into the office and let us see what we can do for you.
