

New Wash System

Load

Unload

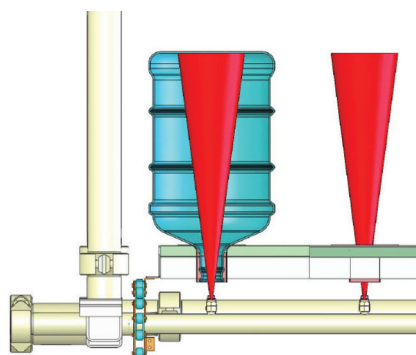

Wash

New System Features:

- Pneumatically actuated, spring loaded neck grippers hold bottles securely, allowing for higher pressure wash spray
- Direct-drive gearmotor with VFD over-torque
- New methods of water conservation and wash solution filtration
- Advanced nozzle technology provides spray patterns that cover all parts of the bottles
- New nozzles and carrier design leads to increased PSI and GPM

➤ **Higher PSI**
➤ **More GPM**
➤ **Better Spray Patterns**
= Cleaner Bottles
