FOOD SERVICES

SUCCESSSES

- Food donations & community support continued
- Styrofoam “eliminated” in retail locations, completed by end of 2020
- Increased plant forward options – Meatless Mondays, installed salad robots
- Offered pop-up mobile markets – food/snacks for medical staff & packaged take-home meals, meal delivery, essential grocery items
- Fun promotion: ‘Waste Not Wag A Lot’, dog biscuits made from food waste
- Increased sanitation, dining room adjustments for spacing

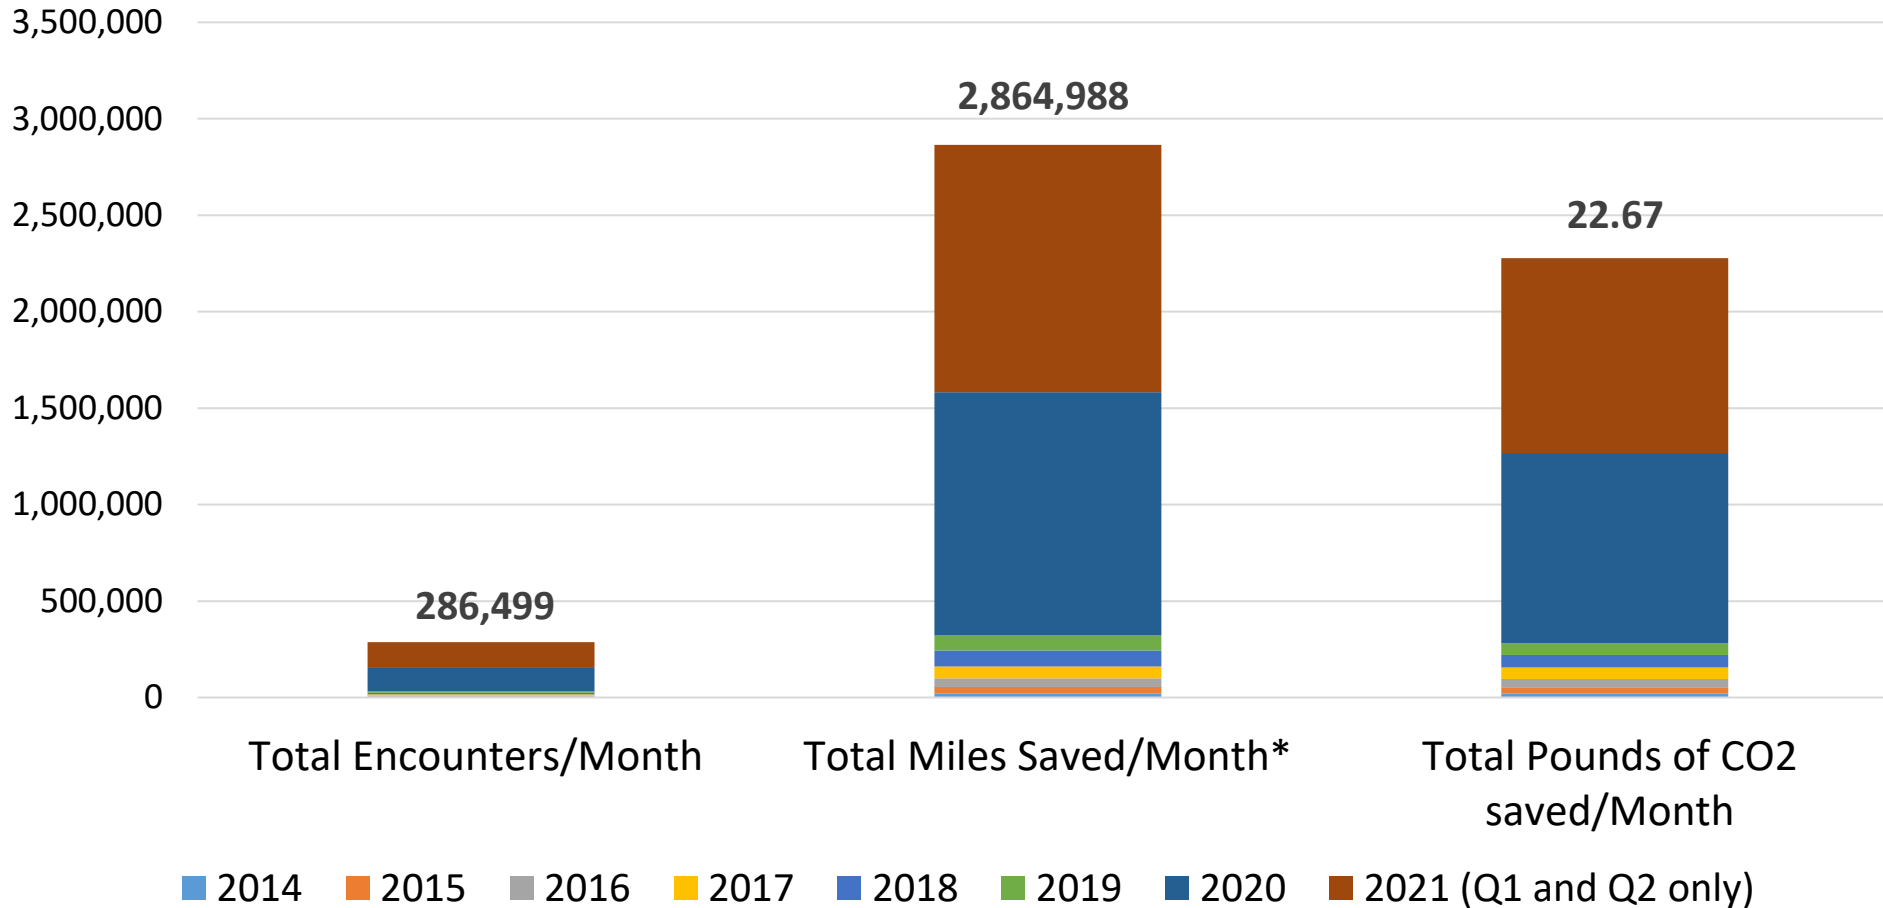

CHALLENGES

- Shutdowns – 40+ weeks (self-service salad bars, etc.) transitioned to “to-go” or served by food services
- Half of retail stations temporarily closed
- Increased use of disposable food service wares
- Supply chain disruptions (disposable containers)
- Staffing

ENVIRONMENTAL BENEFITS OF VIRTUAL CARE

Environmental Impact of Telemedicine

ENVIRONMENTAL BENEFITS OF WORK FROM HOME

Year	Total Miles Driven	Total Metric Tons of CO2e Emitted	Total Unproductive Work Hours
2019	20,653,326	9,068.17	414,894
2020	7,439,484	3,266.42	150,186

- 64% reduction in miles driven and emissions
- 264,709 unproductive work hours saved
