PeopleSoft Northwest Regional Users Group & Northwest Oracle Users Group Present: First Joint Spring Conference
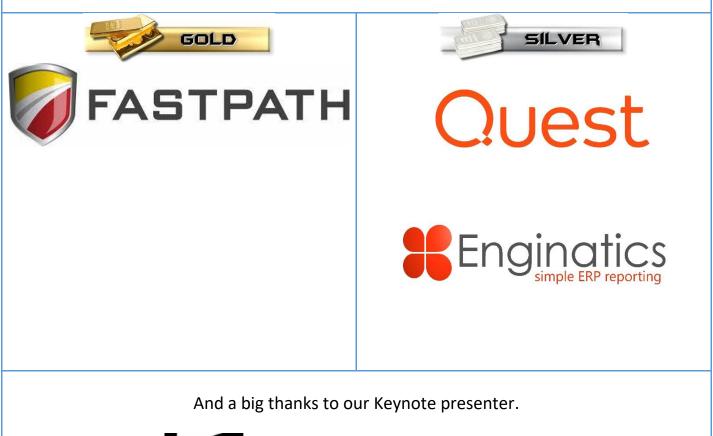

May 14, 2019
7:30 AM to 4:00 PM
Seattle Airport Marriott
3201 South 176th Street
Seattle, WA, 98188

Time	Topic	Where & Who
7:30 – 8:30	Registration open/Light Breakfast, Coffee, Tea & Vendor setup	Washington Ballroom
8:30 – 8:45	Welcome and Opening Remarks	Washington Ballroom **NWOUG** Dale Rae, Chair Andrew Preston, Vice Chair **PSNWRUG** Joseph Isaacks, President Rahm Dinavahi, Vice President
8:45 – 9:30	Keynote – King County's Business Resource Center: A Customer Value Journey	Washington Ballroom King County
9:30 – 10:00	Networking & Vendors	
10:00 – 10:55	Session 1 • **EBS** - Teaching an old dog new tricks • **EXECUTIVE** - How to Effectively Manage an Oracle Audit • **BI** - An Analysts Guide to Exploring Oracle Analytics Cloud (OAC) • **EXECUTIVE** – Networking Round Table Discussion	Renton Suite – Enginatics Salon I – Tarim Olympia Suite -- Huron Consulting Group Washington Ballroom – NWOUG & PSNWRUG combined
11:00 – 11:55	Session 2 • **EXECUTIVE** – Do you have complete change lifecycle solution? Learn how you can automate the complete change migration process. • **Technical** –Platform based architecture with RESTful APIs to integrate seamlessly with Oracle • **Technical** – How Expedia extended its on-prem Oracle EBS with boundary systems on AWS • **EBS --** E-Business Suite and ERP Cloud: Differences and Similarities Related to Internal Controls and Security	Renton Suite – Quest Software Salon I – Expedia, Inc Olympia Suite -- Expedia Group Washington Ballroom – FastPath
12:00 – 1:00	Lunch, Networking & Vendors	Washington Ballroom
1:00 – 1:30	• Networking & Vendors	Washington Ballroom
1:30 - 2:25	Session 3 • **Technical** -Hitch your wagon to a star! Integrating Oracle Fusion Apps using Go! • **Technical** –APEX and The Citizen Developer... The Leap Forward	Renton Suite – The Hackett Group Salon I – Mutual Materials Company

	• **BI** - Snowflake - Changing the Game with Cloud Data Warehousing	Olympia Suite -- Snowflake Computing
2:30 – 3:30	Session 4 • **BI** -Lift and Shift Hyperion Planning to Oracle Cloud EPM • **Technical --** Do you have enough juice? Load Testing Techniques for OAC Essbase • **EBS** -Self Service module for Direct Debit Onboarding	Renton Suite – SpearMC Consulting Salon I – eCapital Advisors Olympia Suite -- Expedia Group
3:30 – 3:45	Networking & Vendors	Washington Ballroom
3:30 – 4:00	Closing Remarks, Giveaways & Networking	Washington Ballroom
4:00 – 5:00	NWOUG & PSNWRUG sponsored networking happy hour	Washington Ballroom or Marriott Lounge

PSNWRUG.COM & NWOUG.ORG
A big thanks to all our Vendor Sponsors for their support.

And a big thanks to our Keynote presenter.

Keynote	
Organization: King County **Presenter:** Business Resource Center	**Session Title**: King County's Business Resource Center: A Customer Value Journey **Abstract:** King County's Business Resource Center (BRC) manages a full suite of Oracle ERP products and supporting services. The suite includes PeopleSoft, EBS, BI/Analytics as well as oversight of PBCS, Oracle's cloud budgeting and planning application. These applications and services are critical to County operations supporting 60+ lines of business across 19 Departments and 15,000 employees. Inspired by a team vison to be recognized as a trusted leader and partner committed to service excellence providing strategic, innovative and reliable solutions and a mission to optimize customer value and experience across the ERP suite, the BRC embarked on a journey to do just that. The BRC journey is a continuing one and at the heart of it is delivering organizational and customer value. Learn how we got started; our focus on building one team across both our own and our customer silos; what has helped us along the way; how we think about the work we do; our current work program; the balancing act between strategic, operational and legislative driven initiatives and our plans for the future.
Session 1 10:00 to 10:55	
Organization: Enginatics **Presenter:** Andy Haack	**Session Title**: **EBS** - Teaching an old dog new tricks **Abstract:** EBS life expectancy has been extended to 2030, and Oracle has announced that Release 12.2 is the final release, meaning EBS users everywhere have a new lease on life. Let us show you how to improve the speed, flexibility and efficiency of your EBS system.
Organization: Tarim **Presenter:** Max Ablimit	**Session Title**: **Executive --**How to Effectively Manage an Oracle Audit **Abstract** Why is it Important? Oracle Audit Risk Criteria Oracle Audit Overview How to Effectively Manage an Oracle Audit
Organization: Huron Consulting Group **Presenter:** Vijay Kurian	**Session Title**: **BI** - An Analysts Guide to Exploring Oracle Analytics Cloud (OAC) **Abstract:** Essbase is an integral part of Oracle Analytics Cloud. It is still the gold standard for analysts everywhere, to explore and analyze their data. Learn how OAC makes self-service data analysis a reality. In this session, you will learn how to build an Essbase Cloud application from scratch and visualize the data set using Oracle Data Visualization. This session will teach you how easy it is, to share your organizations story using the industry leading Cloud platform, Oracle Analytics Cloud.
Organization: Members **Presenter:** Open Discussion	**Session Title**: **EXECUTIVE** - Networking Round Table Discussion **Abstract:** Recommended for organizations Executive, Director and Product Owners to explore strategy and leadership ideas.
Session 2 11:00 to 11:55	
Organization: FastPath **Presenter:** Jeffrey Hare	**Session Title**: **EBS** - E-Business Suite and ERP Cloud: Differences and Similarities Related to Internal Controls and Security **Abstract:** Organizations running either ERP Cloud or E-Business Suite face similar challenges when it comes to security and controls. There are many similarities, but a few notable differences. In this presentation we will cover these similarities and differences and help attendees understand how to effectively design their controls around either of them.
Organization: Quest Software **Presenter:** Phil Rodas	**Session Title**: **EXECUTIVE** –Do you have complete change lifecycle solution? Learn how you can automate the complete change migration process. **Abstract:** Safely deliver the ability to effectively handle the regulatory compliancy placed upon you by the SEC with respect to upholding measure of internal controls of your financial systems.
Organization: Expedia, Inc **Presenter:** Anuj Marwaha	**Session Title**: **Technical** –Platform based architecture with RESTful APIs to integrate seamlessly with Oracle **Abstract:** Are you developing multiple Interfaces (Ex: AR Invoice Interface) for different clients due to custom requirements??

	If yes, Here is the one stop solution which is flexible enough to support multiple clients for a given entity (Ex: AR Invoice). This architecture consists of multiple RESTful APIs that interfaces seamlessly with Oracle for creation of AR Transactions, Receipts Etc. It provides a flexible, reliable, and accurate solution for quick onboarding of new brands/business models with little/no development effort.
Organization: Expedia Group **Presenter:** Harry Gill	**Session Title**: **Technical** –How Expedia extended its on-prem Oracle EBS with boundary systems on AWS **Abstract:** Expedia's 20+ boundary systems integrate with Expedia's Financial Systems Platform (Oracle e-Business Suite). These boundary systems are deployed on AWS. The integration with the boundary systems is through 64+ APIs. These APIs are executed ~ 400M per month. The Financial Systems team architected, designed and built a data landing zone on AWS to capture detail level interface data and where appropriate validate and aggregate the data. The data is then interfaced to the on-prem based Oracle EBS for transaction processing and accounting. We are also creating a Domain Data caching layer to enable boundary systems to perform various domain data queries quickly. Additionally, we are migrating our API middleware platform to AWS.
Session 3 1:30 to 2:25	
Organization: The Hackett Group **Presenter:** Jeff Kayser	**Session Title**: **BI** - Hitch your wagon to a star! Integrating Oracle Fusion Apps using Go! **Abstract:** In this use case we will demonstrate a practical application of implementing integrations between Fusion and AWS. Our End-to-End process incorporates sample custom business needs within Oracle Fusion. We highlight utilizing the GoLang(Google Go) development toolkit on the AWS server that executes Web-Service calls to both extract and publish data to/from Fusion. In our scenario, it is accomplished while maintaining a cloud only presence. Additionally, we will explore interchanging the Web-service HDL to SFTP, REST, SOAP, etc. for external vendors/applications.
Organization: Mutual Materials Company **Presenter:** Derek Solis	**Session Title**: **Technical** –APEX and The Citizen Developer... The Leap Forward **Abstract:** This presentation will focus on Oracle Application Express (APEX), and how we have been able to use this product to replace, enhance, and create some pretty incredible things to complement our already large Oracle footprint. Several business cases will be described during this session along with some technical deep-dives in what makes it all tick. I hope I'm able to give some confidence to those citizen developers out there that are looking for a good outlet to build your developer skills. I assure you that APEX is the one above the rest...
Organization: Snowflake Computing **Presenter:** Ben McClellan	**Session Title**: **BI** - Snowflake - Changing the Game with Cloud Data Warehousing **Abstract:** We all know that data warehouses and best practices for them are changing dramatically today. As organizations build new data warehouses and modernize established ones, they are turning to cloud data warehousing to take advantage of the performance, concurrency, simplicity, and lower cost of the cloud or simply to reduce their data center footprint (and maintenance that goes with that). But what is a Cloud Data Warehouse really? How is it different from traditional on-premises data warehousing and big data platforms? Snowflake's innovative architecture and technology have made data democratization a reality for many.
Session 4 2:30 to 3:30	
Organization: SpearMC Consulting & Oracle **Presenter:** Cameron McClurg (SpearMC) and Nick Cary (Oracle)	**Session Title**: **BI** -Lift and Shift Hyperion Planning to Oracle Cloud EPM **Abstract:** Join SpearMC and Oracle as we present the nuts and bolts of lifting your Hyperion Planning environment and shifting to Oracle Cloud EPM. We'll show you how to do it, discuss pricing options and value add of the cloud.
Organization: eCapital Advisors **Presenter:** Jon Harvey	**Session Title**: **Technical** -- Do you have enough juice? Load Testing Techniques for OAC Essbase **Abstract:** The move of the EPM suite to the cloud has brought speedy performance and speedier deployments, but not without giving up visibility to the back end of the system. While cloud instances perform great, there are times when developers need to validate that the system can handle what they're about to throw at it - at scale.

	What's performance like when 100 concurrent users execute retrieves? Do you have enough OCPU to add another app? Or do you need more? This session will seek to answer those questions and more by covering multiple techniques to simulate concurrency, the pros and cons of each, and pitfalls to avoid when implementing them.
Organization: Expedia Group **Presenter:** Chandra Gopaluni **Organization** – Expedia Group **Co-Presenter:** Raghuram Punati **Organization** – Expedia Group	**Session Title**: **EBS** -Self Service module for Direct Debit Onboarding **Abstract:** Direct Debit On boarding module will provide self service capability enabling Expedia's partners to enroll into direct debit for their payments. This module has replaced manual DocuSign forms and automated the process for direct debit On boarding for Expedia partners thereby reducing the time to on board partners on direct debit from weeks to minutes.

Save the Date:

What: NWOUG.COM Fall 2019 Portland Conference

When: Tuesday, October 15, 2019

Where: Tektronix campus, Beaverton
