

Liability and Responsibility Statement for eHealthCPR Courses

BLS for Providers, Heartsaver, Family & Friends, ACLS, PALS

The course for which you are enrolled may include physical strain, possibility of cross-infection and/or emotional stress. If your physician has recommended that you avoid strenuous activity or limit your activity in any way, you need to realize that CPR is hard work! This is true in practicing on the manikins and doing CPR for cardiac arrest victims.

If you have a medical or coronary history that may be aggravated by this course, you should consult your physician and ask his/her advice as to whether you should participate in a CPR course.

If you have recently had any type of infectious disease, including upper respiratory infection or open sores on your mouth or hands, it is imperative to defer manikin practice until you are well.

eHealthCPR's training center issues eCards through the American Heart Association (AHA). Normally these online eCards are issued and/or printed on the day of the class with advance registration and class payment, however in extreme circumstances it may take several weeks to receive your eCard. You will receive documentation of completion on the day of your class.

eHealth CPR follows the AHA lesson plans for each course, however the length of courses may vary related to the number of students in your class. eHealth CPR follows the AHA recommendation that one instructor will be provided for each group of six students.

The AHA requires participants to have access to a student manual/book, this may be electronic (ebook) or book/manual. An electronic eBook comes with online courses or an electronic manual may be purchased separately. Heartsaver Courses come with a book/manual or eBook that is included in the cost of the course. In this case a Manual/Book will be available at your class or an ebook access code will be emailed to you when you register and prepay for your course forty-eight hours in advance. A book will also be available at your class for those that do not have access to a book/manual, you have not pre-registered for the class forty-eight hours prior to the start of your class, you have not pre-paid for the class, book/manual is not included in the cost of your course or you do not have the opportunity to purchase one. A book will be available at your class for those that do not have access to a book/manual, you have not pre-registered for the class, you have not pre-paid for the class, book/manual is not included in the cost of your course or you do not have the opportunity to purchase one. Books/Manual or eBooks may be purchased online before your class. AHA does recommend that you have access to the book/manual prior to the start of your class. Regular classroom courses do not require you to complete online material prior to your class. If you have registered for a Skills Class only you must have completed an approved online AHA course first. No other student class materials are required for the class.

Please read the above liability statement for CPR classes. Please understand that the organization or the instructor(s) are not responsible for any physical strain, cross-infection (every effort will be made to provide clean equipment and supplies), and/or emotional stress which may occur as a result of participation in the course.
