Would the artist that rendered this C8 Corvette Zora ZR1 (<http://www.corvetteblogger.com/tag/zora-zr1/>) please set forward! Because your render of the rumored mid-engine Corvette is one of the best we've seen yet. We found this posted on Facebook and searching BUZZART has led us nowhere, at least when it comes to automotive designs, so if you're out there, let us know!

The rendered C8 Corvette (<http://www.corvetteblogger.com/tag/rendering/>) is part of a trio of images, first showing the C7 Corvette Stingray and then evolving into what the next generation Corvette might look like in a mid-engine configuration.

Last month during an interview with Autoline, Corvette Chief Engineer Tadge Juechter flatly denied (<http://www.corvetteblogger.com/2015/03/13/video-corvette-chief-engineer-denies-plans-for-a-mid-engine-corvette-zora-zr1/>) that Chevy was building a secret mid-engine sports car. But that hasn't stopped the speculation that a new flagship mid-engine sports car wearing the cross-flag badges may be on the horizon.

To help fill in some details about the how a mid-engine Corvette might look like, *Bold Ride* (<http://news.boldride.com/2015/04/2017-mid-engine-corvette-concept/75991/>) turned to the concept designers at Hansen Arts to imagine a Corvette with the engine in the back.

After the debut of the seventh generation Corvette Stingray back in 2013 along with the Corvette Z06 that bowed a year later, the automotive press has been pretty excited about the prospect that the next generation Corvette may be produced featuring a mid engine layout. Following a sighting of a possible mid-engine mule (<http://www.corvetteblogger.com/2015/01/09/is-this-the-zora-zr-1-mid-engine-corvette-prototype/>) running at the Milford Proving Grounds, prospects do indeed seem higher for a new kind of Corvette – something that Zora Arkus-Duntov always wanted to pursue but was always foiled by the GM bean counters.

Here's conversation starter.

Now that GM is talking about extending some of the design elements of the C7 Corvette (<http://www.corvetteblogger.com/2014/12/16/gms-welburn-future-chevrolet-models-to-carry-subtle-corvette-design-cues/>) to other Chevrolet's, why not take a look at how they would look on a previous generation Corvette, the C6 ZR1.

Some say the best photoshops are those that are somewhat based in reality. The reality is that when you see this “Hennessey HPE2000 Corvette Stingray drag car” for the first time, you may think it’s real. After all, Hennessey Performance Engineering (<http://www.corvetteblogger.com/tag/hennessey/>) has made a name for themselves not only bring more and more horsepower to the Corvette Stingray, but also with their radical Venom GT program (<https://www.youtube.com/watch?v=gWAavCjVQvM>) as well.

But alas, this is just a photoshop, “created for competition” says the note that goes along with the posting by RC82 WORKCHOP on Facebook

Chevrolet has yet to start retail production of the 650 horsepower C7 Corvette Z06 but that doesn't mean we can't speculate about future Corvettes. In case you've been living under a rock or were quarantined with some type of communicable disease, the latest rumor (<http://www.corvetteblogger.com/category/news/rumors-innuendo/>) is that Chevrolet is working on a mid-engine Corvette named after its first chief Engineer Zora Arkus-Duntov.

If you're not satisfied with the looks and performance of the standard Corvette Stingray and the upcoming Z06 model, then SuperVettes (<http://www.supervettes.com/>) might be the place for you to visit with your C7.

The Florida-based Corvette specialist currently offers wide body and performance upgrade kits for all C6 models, including the coupe, convertible, Z06, Grand Sport, and ZR1, and hoods, spoilers, and body kits for C5s.

With the opening of the National Corvette Museum's Motorsports Park (<http://www.corvetteblogger.com/tag/motorsports-park/>) just six months away, the team that will be responsible for running the park continues to grow.

This week, the Museum announced that Matt Busby has been hired as Track Operations Manager.

(<http://www.corvetteblogger.com/2014/01/23/pic-hansen-art-imagines-the-2015-corvette-z06-as-a-convertible/>)

The 2015 Corvette Z06 made its debut last week at the North American International Auto Show and one of the exciting new features on the new super car is that this will be the first Corvette Z06 with a removable roof panel. But that hasn't stopped rumors of a full-on convertible Z06.

A Milan, Italy based graphic design shop named Hansen ART (<https://www.facebook.com/HansenArt>) took that idea and created this beautiful rendering of what a Corvette Z06 convertible might look like.

(<http://www.corvetteblogger.com/2013/09/16/corvette-z07-convertible-prototype-spied/>) from Autoblog, we did some hunting to see if we could turn up any accurate renderings of the next generation high performance Corvette model and it looks like this Arctic White render from TopSpeed

(<http://www.topspeed.com/cars/chevrolet/2016-chevrolet-corvette-z07-ar160356.html>) might have nailed it.
