## **FOR IMMEDIATE RELEASE**

# **Nowicki Autosport Introduces C7 Corvette Stingray Carbon Fiber Engine Cover Components**

**BIRMINGHAM, Mich.** – Nowicki Autosport's all-new C7 Corvette Stingray Carbon Fiber Engine Cover components offer a premium appearance for the LT1 engine – and the visual distinction that's sure to draw attention when the hood is raised.

The components include a central intake cover, side covers and coil pack covers. The coil pack covers also fit the Corvette Z06's LT4 engine. Each cover is manufactured with high-quality, lightweight 3K twill carbon fiber material, along with vinyl ester-infused resin,

for exceptional strength and appearance characteristics. They're also hand-polished to a deep, rich luster.

The new Nowicki Autosport Corvette Stingray Carbon Fiber Engine Cover components are available individually or in a complete kit that can be installed at home with only a few simple tools, mounting to factory attachment points. The side covers bond to the original covers.

The suggested retail price for the complete kit of five components is \$1,655.70. The individual components' retail prices are:

- LT1 Central Cover – \$449.95
- LT1 Side Covers – \$396.95
- LT1/LT4 Coil Covers – \$895.95

Additional Nowicki Autosport C7 components include a carbon fiber front splitter, carbon fiber extended rocker moldings, carbon fiber front fender vent inserts, carbon fiber rear-fender inlets, a carbon fiber Targa-type roof bow and soon to be released Z06 carbon fiber components and more.
