

Previous Meeting Program Notes  
Sunday, March 22, 2015

**Program Notes by Chuck Bruce: (editing & additions by John Morrison)**

We hosted two of the finest US manufacturers (Egglestonworks & Kimber Kable). They demonstrated several of their latest products. Eggleston of Memphis, TN showcased their marvelous 3-way Andra-III and the new and acclaimed EMMA 2-way floor standing loudspeaker. (This is the first time the Emmas have been seen by an Audio Club!) We also enjoyed electronics by Auralic, Rogue Audio, Hegel, and Arte Forma (not often seen and heard in our area - see more on the Event Page!). We also had a complete stack of Auralic gear including Vega DAC and Taurus Balanced Line Preamp.

Nate Mansfield of Kimber Kable, Ogden, UT discussed the latest and greatest from Kimber and why he selected the specific cables he brought for this meeting. This was a well-attended, fun, and interesting meeting where we played lots of music. Several guests attended and we definitely had a fun time, especially the raffle featuring donated coupons from Kimber and CD's from Phil Muse. More details in the Minutes to follow.
