EDUCATIONAL PRESENTATION

~ Courtesy of Bluebonnet Feeds ~

Dr. Jymie Nichols is a research veterinarian working with Bluebonnet Feeds.

She will be addressing **Leaky Gut Syndrome**.

Leaky gut Syndrome is recognized as a cause of insulin resistance, allergies, ulcers, diarrhea, and 'off' behavior in people and horses. Being a syndrome, leaky gut is a very complex condition that is not caused by any one single factor, but usually occurs in response to trauma, stress, metabolic challenge or a combination of factors. Intense exercise is a documented trigger for leaky gut, and therefor high performance horses are very susceptible to this condition. It may be confused with and/or occur concurrently with gastric ulcers.

PLEASE RSVP by JULY 8 SO WE HAVE AN ACCURATE COUNT FOR LUNCH ORDER!
