How do I add a photo to my Membership Directory?

1. The Commodore has made a request for all members to add a photo to your membership directory profile in the Members Only section of our website. That way we can all get to know each other a little better by putting names to faces. But how do you do that? Pretty easy, actually.
2. First you need to find a digital photo of yourself, or one with both yourself and your spouse. It's best if you crop the photo to a portrait style, just from the shoulders to the top of the head so your faces are clearly recognizable.
3. Once you have your cropped photo saved on your computer, you need to login to the website.
4. After you log in, hover your cursor over your login name in the upper right hand corner of the webpage and you will see a selection for "profile". Click on that and your member profile page will come up.
5. Under the "Personal Info" box, click on "Standard Member Directory". At the bottom of the page that comes up you will see instruction on how to add a photo. Click on "Choose File" and then find your cropped photo where you saved it on your computer. Double click on it and hit "Save" at the bottom of the web page. You're done!
6. Your new photo will now appear in the Membership Directory for other members to see.
7. But if this all seems too hard, I'll be happy to do it for you. All you need to do is email me the photo you'd like to use along with your name. I'll crop it and put it in your profile and let you know when it's done. Email me at buds5@comcast.net . Jerry Budnick, Webmaster.
