

I registered for a meal or event on the website but now I need to cancel it. How do I do that?

1. If you need to cancel your registration you must do that from your Profile page before the cancellation cutoff date (usually 2 days before the event). If you need to cancel after the cutoff date, you will need to contact the Rear Commodore.
2. After logging in, move your cursor over your name in the upper right hand corner of any SIYC web page and select "Profile". The bottom left selection on your profile page is "Event History".
3. Click on "Event History" and all the events you have signed up for will be listed. Find the one you want to cancel and click on the trash can located to the right of that line.
4. Unfortunately, all the people you had registered for that event will be removed from the registrant list. If you only needed to delete one or two people you registered, the system can't do that. In that case you'll have to go back to the event and sign in the others who are still going.
