

I looked up my name in the Membership Directory and there is an error. How do I fix that?

1. If you want to change anything in your membership directory listing, that's easy. After logging in, hover your cursor over your name in the upper right of any page and click on "Profile".
2. On your profile page, you will see a box labeled "Personal Info". Click on "Contact Info" and you'll be able to update name, address, phone number and email address. Click "Save" at the bottom when done.
3. Or click on "Additional Member Data" to add or correct information about an additional email address you may have, add or change information about your spouse or the boat you own. Click "Save" at the bottom when done.
4. Or click on "Standard Member Directory" and you can add birthdays, a Bio, or a picture. Click "Save" at the bottom when done.
5. You can also change your Username/Password by clicking on that in the "Website" box.
6. In the "Financial/Historical Data" box under "Transaction History" you can see a list of events you signed up for using the website. Under "Event History" you can see another view of the same thing, but you can also cancel future events you have signed up for using the website. We're not using the Credit Card feature available in the website, so the other three choices to click on won't show anything for you, and there is no need to enter any credit card info.
