I want my Membership Directory to show both myself and my spouse's first names. How do I do that?

1. If you want to include both member's first names in your membership directory listing, that's easy. After logging in, hover your cursor over your name in the upper right of any page and click on "Profile". On your profile page, click on "Contact Info" and you'll see an entry for "First Name". Change it to whatever you want (like John & Mary), scroll to the bottom of that page and click "Save". Your done.
