

Presenter Name: Michael DelCharco, PE, CFM

Vice President

Taylor Engineering, Inc.

Biography: Mr. DelCharco leads the company's water resources group and is charged with maintaining technical excellence, keeping a strategic focus, and ensuring a healthy work environment. In addition, he serves as project manager on larger water resources projects, provides technical oversight and management for the group's water resources, water supply, dam breach, hydraulic modeling, wave modeling, and levee analysis. He is also project manager for coastal and riverine flood risk studies, environmental restoration and mitigation studies, and other hydrologic and hydraulic-related projects.
