

Flood Regulations in the Florida Building Code

When: Tuesday, May 22, 2018
9 AM – 4 PM

Where: Herbert S Saffir Permitting
& Inspections Center
2nd Floor Conference Room I & J
11805 SW 26th Street
Miami, FL 33175

CECs: 6 – CFM
0 – PE (#5341/#178, Course #6851)
0 – ICC (#1707, Course #11788)

Instructor: Martin Duran

Cost: \$50 – FFMA individual members
\$150 – non-FFMA members

Course Description:

Requiring that structures vulnerable to floods be protected against flood damage is part of the NFIP's core purpose and mission. In Florida the community flood damage prevention ordinance and the Florida Building Code (FBC) regulate the minimum construction standards for development identified as vulnerable to flooding. The FBC requires that within flood hazard areas all new buildings, structures, and portions of structures and substantial improvements to existing structures be designed and constructed to resist the flood loads associated with the applicable flood hazard area.

This one-day course gives an overview of the main requirements of the flood provisions for structures regulated by the FBC, with discussion focused on the meaning and relationship between the FBC and the NFIP.

Course Topics:

Building code requirements related to:

- single and two-family dwellings
- non-residential construction
- pools
- accessory structures
- manufactured homes

Course Goal:

Help in identification of compliance with flood provisions of the FBC and to understand them as related to NFIP.
