

**Florida Floodplain Managers Association
2019 Annual Conferences
Abstracts**

- Title:** Florida FEMA Coastal Studies - an Update
- Length:** 30 minutes
- Subject:** Floodplain Mapping
- Target Audience:** Coastal Communities and FPAs; coastal engineers and scientists
- Presenter Name:** Michael DelCharco, PE, CFM
Vice President
Taylor Engineering, Inc.
- Biography:** Mr. DelCharco leads the company's water resources group and is charged with maintaining technical excellence, keeping a strategic focus, and ensuring a healthy work environment. In addition, he serves as project manager on larger water resources projects, provides technical oversight and management for the group's water resources, water supply, dam breach, hydraulic modeling, wave modeling, and levee analysis. He is also project manager for coastal and riverine flood risk studies, environmental restoration and mitigation studies, and other hydrologic and hydraulic-related projects.
- Co-Presenter:** None
- Biography:**
- Abstract:** Since 2009 FEMA has been developing new coastal surge modeling and new Flood Insurance Rate Maps in the State. This short presentation will give the attendees an update on the status for the entire state.
