

Jerry Murphy, JD, AICP, CFM, Florida Resilient Communities Initiative, University of Florida.

Jerry is Associate Research Scientist with the Resilient Communities Initiative at the University of Florida. Jerry is a certified floodplain manager, certified urban and regional planner, and legal scholar. His work and research are focused on land use planning and control law, community-based planning, code and regulation drafting, floodplain management, infrastructure finance and planning, post-disaster redevelopment planning, community resiliency and sustainability.

He currently leads the University of Florida's Resilient Communities Initiative (UFRCI), working with local governments through interlocal agreements. Jerry works to assemble teams of expert faculty, researchers, and student assistants to craft planning solutions to the challenges facing local governments in the 21st Century. He is currently Co-chair of the Higher Education Policy Sub-committee for the Association of State Floodplain Managers (ASFPM) and academia representative for the ASFPM Certification Board of Regents (CBOR).
