

July 6, 2013

The Oklahoma Bicycle Society (OBS) is a not-for-profit club designed to promote bicycling as a safe and enjoyable outdoor activity.

We hold monthly meetings, publish a monthly newsletter, *The Pathfinder*, maintain a website at: www.oklahomabicyclesociety.com and an email newsgroup: ok-bike-society@ayahoogroups.com

Our members come from all walks of life and all levels of cycling experience, and they stand ready to share their vast body of knowledge with fellow riders.

The **Donut Ride** is perfect ride for beginners, families, and experienced cyclists who want a chance to socialize and meet other cyclists. The group bike ride leaves the Will Rogers Park tennis court parking lot as a group at 9:04 a.m. (not 9:00 a.m. or even 9:05 a.m.) every Saturday morning year round. Experienced leaders guide the cyclists on a slow-paced tour along tree-lined residential streets past the stately old homes in Mesta Park. Cyclists will ride about 5.5 miles to Brown's Bakery in downtown Oklahoma City, break for a donut, and then return via a different scenic route. This is a no-drop ride, meaning no one will get left behind, so no worries if you are slow!

Another ride to tailored to beginners and all riders looking for a leisurely mid-week ride is the Wednesday night ride at Route 66 Park on the west side of Lake Overholser at NW 23rd Street. There are several groups leaving from this location at different distances and speeds, so if you are new to the ride make sure to ask someone about the "around-the-lake" leisure group to make sure you don't head out with the "racers" The ride leaves the park promptly at 6:00 PM. This ride is active April through October only.

OBS offers weekly rides year-round for all levels of riders. Please visit our website at www.oklahomabicyclesociety.com and click on *Rides and Maps* then *Weekly Rides* or consult our newsletter, *The Pathfinder*, for details on all our rides.

You may join OBS on-line at this link: <http://oklahomabicyclesociety.com/about-us/new-member-registration/>
