

Oklahoma Prairie Tour

This tour offers the cyclist sights of three unique state parks in the midst of the Oklahoma prairie lands. Little Sahara State Park contains 1520 acres of the best sand dunes for off-road vehicles along the Cimarron River. Just as unique is Alabaster State Park's underground caves and the bubbling springs at Boiling Springs State Park. This 85-mile loop is relatively flat terrain, but just to the east on SR 412 is a unique stretch of mesas called the Glass Mountains.
