Password Hints

A password strength indicator will give you a score on your selected password as you type. Note that this is for your information only - this web site does not enforce specific password rules.

Some tips for a strong password:

- Do not use common, obvious passwords like 'password' or '123'
- Do not use easily guessed passwords like your first name or your birthday
- Include a mix of upper- and lower-case letters and numbers
- Add punctuation and other special characters
- Longer is better
- A 'passphrase' is often better than a complex password. For example, 'My favorite color is ecru' is a very strong password, it is easy to remember and hard to guess
