

# Sandbox Shade/ New Equipment in Harmony Playground

Add a sun-protective shade structure over the sandbox; replace 4 non working “musical” elements with appropriate new structures to better utilize this sizable area of the playground.

**Cost** \$450,000

**Location** Harmony Playground, Prospect Park between 10th and 11th Sts.

## Who Benefits

Children of all ages who visit this enormously popular playground, including those on school field trips, summer camps and regular daytime and afterschool users.

## Project Description

The sandbox for tots sits in full sun. A permanent shade would reduce the risk of sunburn. The structures in the photos should make musical sounds: “Harmony”, but do not work. New equipment is needed.
