

Mission Statement

"To enrich our angling experience and provide bountiful opportunities for future generations."

We, the Wilderness Fly Fishers, prefer angling with the fly and have joined together to more fully share our experiences with all anglers, and to foster the following objectives:

1. Angling Waters

To work for the preservation and improvement of our fishing waters.

2. Regulations

To encourage the adoption of fishing regulations that will conserve and govern the fishing waters so that everyone may experience the kind of fishing he enjoys the most.

3. Education

To promote fly fishing as a satisfying and rewarding method of angling which can be shared by all fishermen. To encourage the practice of common angling courtesies and thereby increase the fishing enjoyment of all. To enrich the general knowledge and appreciation of conservation so that all may effectively aid in the perpetuation of the sport.

4. Research

To encourage research which will contribute to the development of better fishing.

5. Cooperation

To support either individually, or as a group, those organizations or agencies which have pursuits in common with the Wilderness Fly Fishers.

Our legacy to present and future generations is to leave the fishing waters in as good or better condition than we found them.
