Organizer's Tips & Tricks

Show organizer Veronica Campbell has a great way to get people to enter her shows on time, even early!

Veronica started a contest, where if you enter the show by a set date, before the closing date your entry is automatically entered into a drawing and the winner of the drawing receives a free entry. She reports it is the worth the price to not be waiting until the final date to see if you are going to have enough entries.

Computer Applications

[Google Maps](#) - Maps of your property can be created. Use a graphics program to draw over the top of the picture and create your course maps.

[Gliffy](#) - Online graphic tool for plotting obstacle maps and cones courses.

[Gmaps Pedometer](#) - (not completely accurate but works well for planning) great online tool based on Google maps that will measure distances in feet or meters, plot mile and kilometer markers using map and satellite images anywhere in the world.
