Valve Cover Race Rules

No fee to enter

Trophy's awarded for 1st, 2nd, 3rd place & Best Decorated

Chevrolet small block valve covers only, no big blocks.

Gravity race only, NO propulsion of any kind.

Wheels must be solidly affixed to vehicle, No springs or shocks.

NO moving parts except for rotating wheels.

Wheels cannot extend beyond the front or rear of the valve cover.

Wheels cannot exceed 4 inches in diameter and are limited to four in total, all wheels must make ground contact.

Overall outside car width is 10.5 inches maximum, wheel to wheel.

Car may be decorated or painted (optional).

Finished total weights must be fixed. No liquid filled or moving weights.

Maximum weight for finished valve cover racer is 8 pounds.

Cars will be measured and weighed prior to the start of the race. Each will be issued a number at that time if the car complies with the race rules.

Race and Distance:

Track boundaries will be chalked on pavement.

Ramp will be placed at one end in the center of the boundaries.

Car launch must be made with rear wheels against the ramp backstop and must not be pushed in any way.

If the valve cover goes out of bounds it will be judged at the point it crosses the established boundary.

Distance races are measured from the front of the launch ramp to the center line of the rear axle closest to the launch ramp.
