

LAKE OSWEGO HUNT

Rules for Humane Treatment of Equines

The Lake Oswego Hunt, Inc., mandates the following minimum care of equines from all of its employees, students, owners, trainers, exhibitors and their agents, as a condition of use of the facilities and grounds:

- ❖ Increasing education in humane training and horsemanship practices through the conduct of the Lake Oswego Hunt, Inc., Riding School, its members and the general public.
- ❖ Upholding the humane treatment and welfare of horses, regardless of value, as the primary consideration in all activities.
- ❖ Requiring that horses be treated with the kindness, respect and the compassion that they deserve, and under no circumstances be subjected to mistreatment*.
- ❖ Ensuring that employees, students, owners, trainers, exhibitors and their agents use responsible care in the handling, treatment and transportation of horses, as well as horses placed in their care for any purpose.
- ❖ Providing for the continuous well being of horses by mandating routine inspection and consultation with health care professionals and competition officials to achieve the highest possible standards of health, comfort, sanitation and safety as a matter of standard operational procedure.
- ❖ Reviewing, revising and developing competition rules and regulations that protect the welfare of the horses.
- ❖ To use every measure and resource available to provide humane retirement to equines.

*** The standard by which conduct or treatment will be measured is that which a reasonable person, informed and experienced in generally accepted humane equine training and exhibition procedures would determine to be neither cruel, abuse or inhuman.**

LAKE OSWEGO HUNT

Rules for Humane Care of Equines

The Lake Oswego Hunt, Inc., mandates the following minimum care of equines from all of its employees, students, owners, trainers, exhibitors and their agents, as a condition of use of the facilities and grounds:

Nutritious food in sufficient quantity

- ❖ Food shall be provided in sufficient quantity and be adequate and appropriate nutritive value.
- ❖ Diet shall be prepared with consideration for the age, breed/type, condition, size, and work level.
- ❖ Equines should score by a veterinarian no less than a body condition score 3 on the Henneke Condition Scoring Chart to be considered of adequate weight.
- ❖ Equines shall have access to adequate natural forage or be fed daily or as recommended by a veterinarian.
- ❖ All storage and feeding receptacles shall be kept clean and free from contaminants, such as feces, mold, mildew, insects, etc.
- ❖ If more than one animal is fed at one time or in one place, it shall be the responsibility of the owner to ensure that each animal receives nutrition in sufficient quantity.

Necessary Veterinary Care

- ❖ An equine shall be afforded immediate veterinary care if known or suspected to have an injury, or exhibiting such signs as shock, colic, founder, tremors, swelling, broken bones, open wounds, inability to eat or drink, blistering, irregular or abnormal breathing, partial or total paralysis, abnormal discharge or bleeding, signs of disease, severe parasitic infestation or infection, loss of appetite, weight loss, abnormal skin condition or hair loss, temperature fluctuation, persistent diarrhea, inability to bear weight on a limb or lameness, or other such sign.

Recognized Standard Veterinary Care Guidelines

- ❖ Hoof maintenance and trimming every six (6) to eight (8) weeks, or as directed by a veterinarian or a farrier.
- ❖ Parasites kept under control through worming every six (6) to eight (8) weeks or as directed by a veterinarian.
- ❖ Annual dental check-up and necessary treatment to ensure proper and adequate food digestion.
- ❖ Vaccinations as recommended by a veterinarian.
- ❖ Proof of testing for Equine Infectious Anemia (Coggins Test) is mandated by law in the following cases:
 - When equines are being transported through state lines
 - When equines are bought or sold
 - When equines are at shows or gatherings

Proper Drink

- ❖ Proper drink shall mean clean, potable water available at all times for all equines.
- ❖ Exceptions shall be determined by veterinary consultation of professionally accepted practices for the safety and well being of the equine.
- ❖ Equines that are being worked or are in transport shall be provided water as often as necessary for the health and comfort of the equine. Frequency of watering shall consider age, breed/type, condition, size and quantity of equine(s). Activity levels and climatic conditions must be considered.
- ❖ Equines that do not have free access to water must be offered water at least twice daily. All water receptacles shall be kept clean and free of contaminants and be positioned or affixed to minimize spillage.

Proper Air

- ❖ Enclosed areas should be constructed or modified to allow free flow of air to control temperature, humidity and prevent air stagnation.

Proper Space

- ❖ Space available to the equine must be usable and safe (e.g., must be provided an area free from standing water, accumulated waste, sharp objects and debris and maintained in a safe and healthful manner).
- ❖ Fencing shall be well maintained and in good repair at all times.
- ❖ Equines shall be allowed to exercise and have freedom of movement as necessary to reduce stress and maintain good physical condition. Space and provisions for exercise must be appropriate and sufficient for the age, breed/type, quantity, condition and size of the equine(s).

Proper Shelter

- ❖ Shelter for equines shall have at least a roof and three sides and be kept in good repair and free of standing water, accumulated waster, sharp objects and debris. Proper shelter provides protection from inclement weather conditions (e.g., prevailing wind, sleet, rain and arid temperature extremes).
- ❖ It is the responsibility of the owner/custodian to ensure that each equine taking into consideration age, breed/type, and health, has access to proper shelter and protection from the weather (e.g., relief from more dominant equines that may exclude him/her from the shelter).

Protection from the Weather

- ❖ All equines should have access to proper/appropriate protection and shelter from weather extremes.
