

*Esqueda Sonora, August 19, 2020*

Many thanks to those in charge of these scholarships, I will always be grateful for the great help you gave me because now I have finished this stage and all thanks to that. I am happy that people like this care about the well-being of young people who struggle and in this way they help us feel more motivated.

At this stage of my life I managed to meet good people who will always remain in my life, in the same way, I lived great moments with them. In high school I managed to develop my sports skills; I was part of the volleyball and softball teams and also participate in computer and physics contests, all this thanks to the scholarship you gave me for the last 3 semesters. Now I am studying mechatronic engineering at the University of Sonora and I am ready to achieve all my future plans.

Thank you for helping my family and I and thanks for helping so many students.

Sincerely,

Sheila M.
