

# 27th Annual Black Tie Regatta

Rush Creek YC, Lake Ray Hubbard, TX, April 20 - 22

Thanks to Regatta Chairman Pete O'Connell and Fax we have the results of the Black Tie just as we go to the printer. I got Jim Gluek on the phone on Tuesday and he provided the basis for this account of the regatta.

Rain and lightning led to the cancellation of Friday's races, but plenty of boats were out practicing and tuning. Saturday cleared off and brought in a light (8 - 10mph) breeze. Jim and Eric were about the only skippers who took crew and the harbor was too far to let them off the boat. That first race was a tight one all the way around the single triangle. Eric won that one.

The second race saw Jim first to round the top mark but lose several boats due to weight on the reaches. Eric came back from 8th to finish and come close to nipping Jim for the 3rd spot. For the 3rd race the wind got a bit lighter. Jim got a good start at the weather end and he and Ernie took off. At the bottom mark there were four bunched together. Jim held on to win that one.

With less than 2 points separating them and with Eric in first, the 4th and final race was a duel between the two. With Jim able to put several boats between himself and Eric to win the regatta.

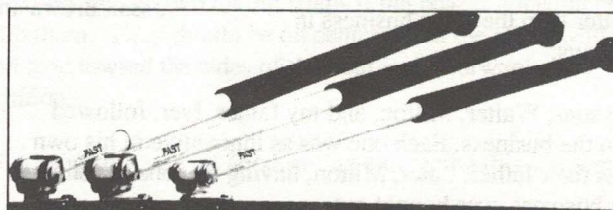

POS	NAME	BOAT	1ST	2ND	3RD	4TH PTS
1	Jim Gluek-North Sails	1290	6	3	1	20.4
2	Eric Hood-MBW	1310	1	4	4	27.7

## Board of Govs. Notes

The Board of Governors will be meeting at the Chicago Yacht Club on April 28th this year, which is just about the time you will be reading this edition of the Newsletter. We will publish the results of that meeting in the July Newsletter.

Depending on the action taken at the Board meeting, we may be sending out proxy notices for the Annual Meeting of the IMCCSRA which will be held June 20 at the Nationals at Clear Lake, Iowa. That's another reason (besides the fun of competition and good time) for you to plan on sailing in the Nationals - to vote on new board members and whatever issues are put to the membership. We will be replacing two or three Board members at that meeting.

## Sail Faster Sail Safer

StaFast's *PATENTED* TX tiller extension is the best. Guaranteed! It does what no other tiller extension does because of its *PATENTED DESIGN*.

- Always stays *EXACTLY* where you leave it — no more sliding away out of reach
- Not loose or sloppy — providing the most "SENSITIVE FEEL" of the helm you've ever had
- Lightweight, ultra strong stainless steel/ anodized aluminum construction is virtually unbreakable
- Center balanced pivot point provides easy high angle swiveling on any plane
- *Special new, non-slip* comfort foam grip and safety ball knob
- New optional telescopic adjustable length tube

### The best. Guaranteed!

Use StaFast's *PATENTED* TX tiller extension for 30 days. If you don't agree that it is the finest tiller extension you've ever used, return it for full refund. If your TX tiller extension malfunctions in any way, within one year, return it for a full refund or replacement.

Size	Model #		Price
	3/4" tube	1/2" tube
