Call for Proposals

Social Justice and Professionalism: Exploring the Challenges and Opportunities

We will address:

- What does our experience with healthcare in the 21st century tell us about successes, failures, and opportunities in embracing social justice as a professional value?
- What is our path moving forward?

Please submit abstracts related to social justice in practice, education and experience and join us for a robust discussion. While submissions related to social justice education and practice are encouraged, we continue to welcome abstracts focused on general professionalism and professional formation as well, all making for a rich and invigorating program.

Abstracts (4000 characters max) will be blind reviewed.

We welcome submissions for:

- Oral Presentations (30 min) – Oral presentations should present data and raise new or novel questions
- Panel Discussions (60 min) – Panel discussions should be interdisciplinary and explore various facets of a single topic.
- Workshops (60 or 90 min) – Workshops should be interactive and teach processes or methods that can be adopted by participants.
- Posters (scheduled poster sessions) – Posters should describe research, innovative educational or practice initiatives, or offer visual depictions of conceptual work.
- Flash Presentations (5 min) – Brief reports of research
