

1-PAGE PROJECT PLANNER

We've used lots of project planning tools, some pretty complicated. We needed a simple tool we could use for 90% of our projects. The 1-Page Project Planner and the Center's training has reduced project errors and conflicts and let us develop a common language that makes everything go much more smoothly. - Brian Wagner, Senior Project Manager, TASC

Introduction

People resist planning; they want to "just get to work." Even with the Center's support, it's hard to get people to agree on a plan, but 4 hours of planning can save 400 hours of frustrating reinvention *and* let everyone succeed together on something big. It's tough to stick to one page, but the discipline is critical: it compels everyone to be concise and focused on essentials.

Special skills Estimating, scheduling

Instructions (see details next page)

A common mistake is to jump ahead to assigning tasks before getting firm agreement on goals and management concepts. Plan to run through two iterations.

1. **Prepare:** The PM must pick just the right people and perspectives.
2. **Align:** Make sure everyone agrees on terms, concepts and goals.
3. **Set the tasks:** Brainstorm to fit the categories provided. Distill to ten.
4. **Refine:** Set realistic durations and budgets. Iterate with the tasks.
5. **Kick-off:** Start, adjust, learn, adjust. In the end, celebrate success!

Make It Better

Member should share ideas for improving any of the Center's tools and how they're taught and formatted. It's also great to suggest new applications or brand-new tools.

First time vs. big team

If your team hasn't done this kind of work before, you might spend more time on Meetings 0 and 1. If your team is big and has a lot of experience, you might need more time agreeing on the tasks in Meetings 2 and 3.
