

A TRADITION OF EXCELLENCE

FALL 2020 GRAND OPENING

January 24, 2020

Pre-Kindergarten Program: 4-year old children

Saint Joseph School in Bronxville is pleased to announce the Grand Opening of our Pre-Kindergarten Program for the September 2020 School Year!

The SJS Pre-K Program has been designed to nurture:

- * faith, spirituality, and values.
- * foundational academic skills.
- * active exploration in our brand new, state-of-the-art, learning environment.
- * cognitive/academic, linguistic, physical, and social-emotional learning.
- * a multi-sensory, child-centered approach.
- * physical fitness and movement.
- * music and art experiences.

TUITION:

Full-day tuition: \$9,990.

Half-day tuition: \$7,490.

A study of comparable, local Pre-K tuition rates revealed that OUR IN PARISH TUITION RATE IS LESS THAN most of the other local programs, please see our website for out of parish and other minor fees that may apply. We also offer multiple sibling discounts.

**If your child has already been registered at a different Pre-K Program, SJS will credit your verified registration fee up to \$300.00.*

FLEXIBLE MORNING CARE AND AFTER CARE PROGRAMS (additional costs apply):

Another fantastic feature of SJS is that our doors open to welcome our students at 7:00 AM for the Morning Care Program, and they close at 6:00 PM for our After Care Program.

We are excited to welcome your 4-year old to the Inaugural Class of 2020 and look forward to their graduation in 2030, where they will be on their way to the best high schools in the region!

A TRADITION OF EXCELLENCE

BEST-IN-CLASS RENEWAL 2020

January 24, 2020

Rev. Peter McGeory '63 and Mrs. Mary Ellen Sanchez are proud to announce the work of the **Best-In-Class Committee**. Our pastor and principal formed the committee in 2019 to explore the creation of a Pre-K, the updating of our science facilities, and the formation of distinct spaces for technology, reading, and digital art, as well as creating useful common spaces for the entire Church community.

The school is one of the **cornerstones** of our Parish. Future leaders, doctors, engineers, lawyers, and teachers – whatever you child's passion will become - are walking the halls of SJS today. The individualized, differentiated education that each student receives along with the faith and values that are instilled in them, will allow them to go out and make the world a better place.

Effective **education** derives from excellent and dedicated teachers with a well thought-out and robust curriculum. It is further enhanced by taking place in well-planned, inspiring, modern spaces, with the best equipment.

The **total formation** of a child is best accomplished with an excellent education that embraces extra-curricular activities and social interactions occurring in a community with active and engaged parents, families, faculty, and clergy. While our school works to be "Best-In-Class," the **Men's Club** and **Mothers' Club** work hard to keep our school and parish community "**Best-Out-Of-Class**" as well, by offering athletic programs, educational and social enrichment programs, social events, and service opportunities.

We've worked hard to put it all together and here's what we're doing to keep Saint Joseph School "Best-In-Class!"

A new Pre-Kindergarten. The relocation of the Kindergarten Classroom to a new modern space and the transformation of that existing space into a Pre-Kindergarten. Keep a look out for an announcement just for this!

A new Technology, Reading, and Art Center (TRAC) will allow students to work with cutting edge technology, featuring new computers (already being utilized in the current computer lab,) 3D printers, and plotters. They will learn and work interactively but still be able to grab a good old-fashioned book from a shelf and turn a page. This room will also be beneficial to the entire Parish community as it will be a modern gathering space for presentations and other events.

The Science Lab will be fully modernized. The final lab layout, furniture, and equipment will give our faculty and students a space that is focused on teaching the science curriculum in a new and more collaborative manner, while being adaptable to future evolutionary trends in methods of teaching and learning.
