

BICEPP and your business

During a disaster, the primary responsibility of local government is to restore basic public services before rendering assistance to the private sector. Direct aid may not be available immediately. Pre-disaster mitigation measures and post-disaster recovery plans are essential. By working together, we can efficiently prepare for disaster.

It is recommended that the private sector be self-sufficient for a minimum of three days.

Are you prepared?

Since 1983, BICEPP has served as a forum to exchange information in emergency preparedness and contingency planning within the business community.

Membership

BICEPP members represent a wide range of industries and organizations:

- Fortune 500 corporations
