

GPS Recommendation for Dual Sport Riders

We recommend the Garmin GPSMAP 78. You can order it from The GPS Store for \$169.95 at this link:

www.thegpsstore.com/Garmin-GPSMAP-78-Color-Handheld-GPS-P2380.aspx

You will need a handlebar mount for the GPS at this Link: www.amazon.com/Ram-Mount-RAM-B-149-GA40U-U-Bolt-Garmin/dp/B00443RVCO/ref=pd_cp_e_3

You will want to hard wire the GPS to your motorcycle's 12 volt power system with this power cable: www.amazon.com/Garmin-Power-Cable-StreetPilot-Series-010-10082-00/dp/B0000ADX9D/ref=pd_sim_sbs_e_1?ie=UTF8&refRID=0X80V0B2PRREXX2AHCHV.

We will load the tracks on your GPS at the event but to load maps and tracks and manage your track library yourself you will need Garmin Map Source or Base Camp. We use Map Source but Garmin does not sell it any more. You can buy used copies of Map Source software on Ebay.
