

Bare Boat Charter STANDARD (104)

(Intermediate Coastal Cruising)

Prerequisites: Basic Keelboat Sailing Certification, Basic Coastal Cruising Certification

GENERAL DESCRIPTION: An advanced cruising standard for individuals with cruising experience. The individual can act as skipper or crew of a 30 – 50 foot boat sailing by day in coastal waters. The Standard includes knowledge of boat systems and maintenance procedures.

SAILING KNOWLEDGE

A Certified Sailor has successfully demonstrated his or her ability to:

Planning

1. State and discuss the following:

- The fuel tank capacity and powering range of the candidate's boat
- Factors which affect the range under power
- The boats water capacity and crew minimum daily water requirements
- The cause, prevention and treatment for sea sickness
- The appropriate clothing for sailing (comfort and Safety)
- Menu planning and provisioning and suitability to the day's activities
- The minimum content of a first aid kit for a one week cruise
- The spare engine parts for a one week cruise
- The documents and procedures required to cross international borders and how to determine the above for any cruising location

Living Afloat

2. Discuss galley procedures that minimize the danger of fire, scalding or other galley accidents.
3. Use common cooking systems (Stoves and Fuel).

Weather

4. Describe the sea breeze and land breeze effect.
5. Identify conditions that cause fog.

Seamanship

6. Describe the use of radar reflectors.
7. Describe and discuss what to do when (under power):
 - The engine cooling water fails to flow
 - The engine fails in a crowded anchorage where safe sailing is impossible
 - The engine fails in a busy channel
8. Describe two methods of getting a man overboard back in board.
9. Describe the information required and procedures for tying a boat to a fixed dock in area with large tidal ranges.
10. State the factors to consider before allowing anyone to go swimming while at anchor.
11. Describe how to secure a boat with an anchor on the bow or stern with the other end made fast to the dock or shore.
12. Describe the use of an anchor to hold a boat off a windward dock when abreast of that dock.
13. Describe the methods of rafting at anchor and potential dangers.
14. Describe the actions taken to prevent the dinghy from bumping the boat in the night.
15. Describe the proper operating procedures for the marine head and list precautions that prevent malfunction.
16. Describe the following common courtesies and customs of yachtsmen:
 - Permission to board
 - Permission to come alongside
 - Courtesy in crossing adjacent boats when rafted
 - Rights of first boat at an anchorage
 - Keep clear of boats racing
 - Flag etiquette: national flag, courtesy flag, burgee/house flag
 - Offering assistance to other yachtsmen in trouble

Sailing Skills

A certified Sailor has successfully demonstrated his or her ability to:

17. Perform routine daily and weekly maintenance procedures on an engine.
18. Locate and check conditions of all USCG required equipment aboard.
19. Maneuver the boat under power in confined space.
20. Stop the bow of the boat within four feet of a fixed marker in various conditions while under power (pick up a mooring buoy).
21. Dock stern or bow to dock or shore using bow or stern anchor.
22. Apply 72 COLREGS (Navigation Rules), rules 1 – 19.
23. Demonstrate the use of the VHF.
24. Check that all systems and equipment on the boat are in good working order and demonstrate knowledge of safety relating to them
 - engine
 - electrical system
 - stove
 - electronics
 - sails
 - hull
 - deck hardware
 - ground tackle
 - through hulls
25. Demonstrate the proper operation of a marine stove and the proper way to extinguish a fire.
26. Demonstrate suitable methods and precautions while towing a dinghy.
27. Sail a compass course with sails set properly while reaching and running.
28. Demonstrate two different ways of returning to a man overboard in moderate winds.
29. Plot a course and determine compass heading and E.T.A.
30. Read a nautical chart and identify corresponding landmarks and aids to navigation.

31. Take a fix using visual bearings.
32. Determine the depth above or below chart datum using tide tables.
33. Pilot a boat into an unfamiliar harbor or anchorage by day using a nautical chart and tidal information.
34. Obtain and interpret the marine forecast.
34. Set and retrieve two anchors set in a Bahamian mooring (fore and aft).
- 36. Has acted as skipper and crew on a live-aboard cruise of at least 48 hours.**

Knots

37. Tie a rolling hitch and a trucker's hitch in 20 seconds or less.
