

Safe Water For Every Child

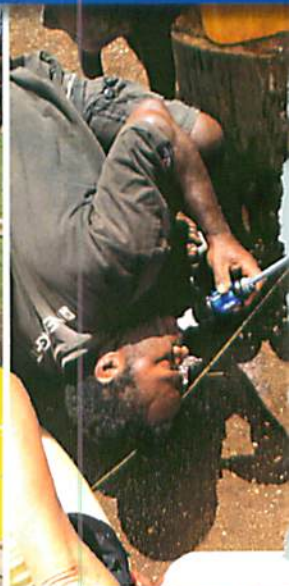

There is an old Brazilian saying, "When you have a dream, it is only a dream, when you share that dream, it is the beginning of reality"

We have a dream to bring "Safe Water for Every Child" Partnering with the SkyJuice™ Foundation. We have the solution. We can give every child on the planet access to safe water.

For an average cost of \$US4000, a single SkyHydrant™ water filtration system can bring safe water to 350 families for 10 years, with no ongoing costs or power supply.

Disaster Aid International has ongoing clean water projects in the Philippines, India, Malaysia and projects proposed in Colombia and Brazil.

With your support we can bring "Safe Water to Every Child."
