

SAWYER®

Custom Water Solutions
Life Giving - Water for everyday life
Life Saving - Water in natural disasters
Life Protecting - Water in refugee settings

THE SAWYER 0.1 MICRON ABSOLUTE DIFFERENCE

- Sawyer's fiber walls are thicker and more robust than other Hollow Fiber Membranes. This allows for higher pressure both for filtering and for backwashing. Sawyer filters can handle 60 PSI forward and 20 PSI backwards.
- Sawyer has a proprietary process of making all pores more uniform in size.
- Sawyer's proprietary process allows for more pores, giving better flow and less cleaning.
- Sawyer's proprietary design has a self priming mechanism to eliminate air locks, making them much easier to restart.
- Sawyer 100% tests all filters to insure no pore is larger than 0.1 micron.
- Sawyer 100% flow tests all filters to insure adequate flow.
- Sawyer 100% tests filters after final assembly to insure quality.
- There is nothing to wear out inside the filter. If water is flowing, it's good.

AVAILABLE PRODUCTS

Bucket Filter

Includes everything needed to attach the Sawyer Squeeze filter to a plastic container like a bucket (bucket not included).

Filter: 0.1 Micron Absolute Hollow Fiber Membrane

Product variations and accessories:

- 1 foot or 3 foot hose (SP180, SP1803)
- Spigot for clean bucket (SP180S)
- Faucet adapter for tap - (SP119)
- Drill bit or No Drill Bit - (SP180, SP180ND)
- Knock Down Shipment - (250 unit minimum, SP180KD)

Two Gallon Bladder and Filter

The Two Gallon Bladder (7.56L) is collapsible, light weight, and ideal for disaster settings where transporting buckets is challenging. Filter assembly sold separately.

Filter: 0.1 Micron Absolute Hollow Fiber Membrane

Product variations and accessories:

- 2 Gallon Bladder (SP109)
- Filter Assembly for Bladder (SP189)
- Hanging Strap (SP166)

Mini Filter

The Mini fits in the palm of your hand and can be configured many different ways. It's ideal for personal use.

Filter: 0.1 Micron Absolute Hollow Fiber Membrane

Product variations and accessories:

With a straw and cleaning plunger (SP211)

Fits on 28mm plastic bottles

With re-usable squeeze pouches - 16oz, 32oz, 64oz

Packaged for retail sales with a straw, 16oz pouch, cleaning plunger (SP213)

S1

S2

S3

Foam+ Filtration Systems

The Foam+ Filtration Systems combine Sawyer's signature 0.1 micron absolute Hollow Fiber Membrane filter with proprietary Foam technology developed in partnership with the company Foamulations to remove virtually all contaminants found in fresh water.

- The S1 removes bacteria, protozoa, cysts, chemicals, pesticides, taste, and odor. (Foam Filter is good for 1600 uses)
- The S2 removes viruses, bacteria, protozoa, cysts, chemicals, pesticides, taste, and odor. (Foam Filter is good for 800 uses)
- The S3 removes heavy metals (including lead and iron) viruses, bacteria, protozoa, cysts, chemicals, pesticides, taste, and odor. (Foam Filter is good for 400 uses).

10" Filter

This unit attaches to your plumbing and removes harmful contaminants before they reach your faucet, allowing you to confidently use your faucet water for drinking, cooking, cleaning, and more.

Filter: 0.1 Micron Hollow Fiber Membrane

Product Variations and Accessories:

Sawyer 10" Filter Kit comes Pre-Plumbed w/ PVC Back-Wash System (SP202)

Without the PVC plumbing (SP201).
