

Covid-19 and Its Impact

The members and volunteers of PVP Village have continued to engage with and support one other during this pandemic. In particular, the social and volunteer services provided to our members are essential for the well-being of older adults during this period of extreme social isolation. PVP Village currently offers its members:

- A wide variety of virtual and in-person programs and social groups
- Handyman and tech volunteers to assist with minor home issues and staying connected
- Transportation to medical appointments
- Grocery shopping and running errands
- Extensive referral resources of companies and services recommended by members
- Educational events on topics of interest to the older community
- Intentional caring groups and phone outreach to more isolated members
