

When NOT to Try Jawsing?

1. If you are too far from the hoop and/or you are not confident about running the hoop.

OR

2. If after your shot one or both of your opponent balls are either directly behind the hoop and/or able to dislodge you or close enough to try a jump shot.

OR

3. If you are very close to the hoop and have a straight angle, and one or both opponent balls are in bad position relative to the next hoop. If so, just try running the hoop long toward the next. Swing low, slow, but follow through!!!!
