## THE GROWING CASE FOR SCIENTIFIC HAND ANALYSIS

It's epidemic. Increasing numbers of people are feeling bored, unfulfilled, stagnant, and stuck...like something is missing. Somewhere between 60-70% of corporate leaders and employees are unhappy, and express that weak engagement via lackluster performance.

Entrepreneurs at all success levels are realizing income and position do not translate directly to meaning, legacy, and fulfillment. How do they fill that hole and get unstuck? Why aren't they satisfied?

The world is changing, and the environment around us is evolving to one of contribution and meaning...living a more spiritual existence. Working merely to "make a living" is no longer the desired norm but the exception. People are demanding fulfillment, and crave to make a difference. They want to live "on purpose," and are willing to undergo big transitions in order to do so. But how? What does living on purpose look like for each of them?

People are flocking to coaches and mentors, searching for meaning and passion in their lives. Just how are they supposed to make a difference?

What is their purpose? Who are they at their core and what exactly are they designed to do?

Books by the dozen, and workshops too, abound to support this quest. And they can be very helpful. But questions and doubts inevitably linger... "Did I do the exercises correctly? What if my gut feeling was off-base? Is that author or facilitator truly expert enough to ensure the accuracy of his guidance? Should I really trust what she wrote? Do I trust myself enough, and that process, to change my life? I need more specific information. This is SO important, I don't want to make a mistake or head in the wrong direction. How can I figure out what I'm really supposed to do?!"

The solution, burgeoning in its awareness and practice, is Scientific Hand Analysis. Many Hand Analysts are coaches, counselors, and therapists using SHA as a key tool in their repertoire.

Why? It's findings are independent of client input. They don't have to take a test and answer 100 questions. The results won't change depending on their mood or circumstances. They don't have to talk for weeks to give their therapist foundation and insight. It's all right there, in their hands. It's their unique, specific, accurate, and actionable blueprint.

Yes, it is *scientific*. The lines in your hands mimic the neural pathways in your brain. Consistent thought and behavior patterns not only mark your brain but also your hands. The more frequent and/or intense the thoughts and behaviors, the more defined the lines in your hands. Neurologists, geneticists, therapists, and coaches are fast embracing this compelling, complex, and shockingly accurate modality. (So accurate that FORBES wrote an article about it, [read it here.](#))

Researchers gathered and compiled data for over 40 years, from over 30,000 hands, to develop this learnable system. It is NOT “fortune-telling,” but a combination of ancient hand-reading (mentioned in the Bible at least 30 times), and even more so, current advances in neuroscience and human psychology.

Your hands contain specific information like a blueprint that uncovers your unique story of who you are and why you are here. In addition to the hands’ lines and shapes, fingerprints provide deeply profound guidance. Your fingerprints are formed in utero at 14-16 weeks and NEVER change.

This blueprint consisting of lines, shapes and prints, reveals your innate life purpose...how you are meant to make a difference in the world...your challenges and blind spots, special gifts and talents, and more. When you think about it, of course God would give us a roadmap to our deepest selves, gifts, purpose, and issues!

Hand analysis does not depend on the honesty or self-awareness of the person being read. The information is consistent and is independent of client input. It provides much more breadth and depth about purpose, special gifts and talents, aptitudes, challenges, potential, and approach to relationships, work, and life. Hand analysis addresses the big Why’s, in addition to the How’s.

Those individuals experiencing hand analysis, committed to living their purpose and making a difference no matter how late in life, describe this methodology with these words: life-changing, fascinating, shockingly accurate, mind-blowing, cathartic, jaw-dropping, and amazing.

Some of the benefits of Hand Analysis include, for individuals:

- Know your Life Purpose and live it (your area/work of greatest potential / fulfillment)
- Confirm you are on the right track
- Understand your special innate gifts and talents
- Make a more meaningful contribution to the world
- Become a better leader, role model, manager, person
- Know your Life Lesson; learn from it to make better choices and improve your life; stop the negative patterns and reduce challenges and obstacles
- Achieve more joy, fulfillment, peace of mind and success
- Understand your relationship issues and heal them
- Discover greater compassion for yourself and others
- Deepen your spiritual connection
- Increase your intuition and self-confidence
- Give yourself permission to be authentically YOU, to know why you came into this life, AND know how to live that life more fully
- Answer the big “Whys” in your life
- Clients say one hand analysis is comparable in learning and value to at least 1-3 years of personal growth, self-improvement work, or psychotherapy

Benefits also include, for organizations:

- More effective leadership
- Stronger manager performance, productivity, and profitability
- Place employees and team members in their ideal work positions
- Higher retention
- Improved morale and engagement
- Greater teamwork performance, productivity, and alliance
- More creativity and innovation

The pool of Scientific Hand Analysts, and the masters who teach them, is growing, because the demand is increasing exponentially. People want

guidance, direction, confirmation, and answers, and they want it now. Hand analysis, conducted by a trained professional, cuts through the doubt, confusion, time commitment, and vagueness of many other resources.

Before long the epidemic will shift, from those searching to those taking action on the profound information available to them in their own hands.

Don't be left behind...consider adding this amazing tool and it's high value to your clients' options for guidance, clarity, and direction!
