

The precious and authentic
aroma of coffee

Discover our Compatible Capsules range

Craft tradition and technology: we'll reveal to you why Caffitaly is better

We take care of every single detail and use only the best technology, which is why our compatible capsules are considered the best on the market.

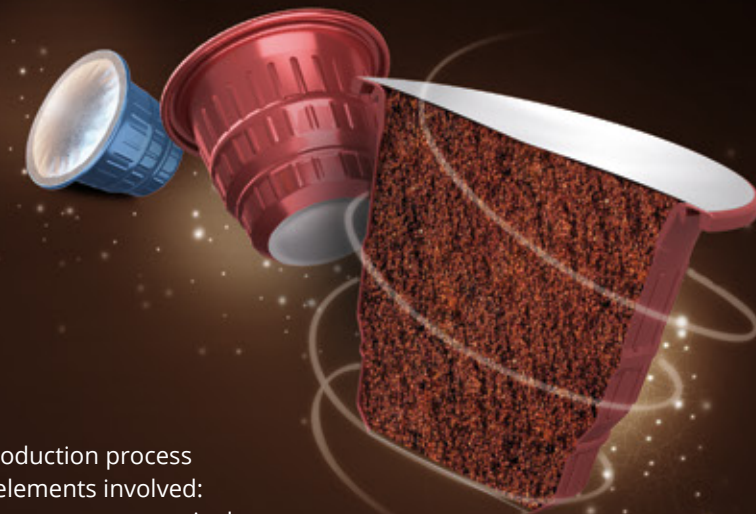

Our enthusiasm and our love of coffee translate into the attention we pay to each step that turns every bean into a precious blend.

So Caffitaly has applied its innovative technology, stemming from years of research and development, to the segment of compatible capsules, to guarantee its partners an always top quality result in the cup.

Compatible Capsules **Plus**

Controlled from the origin

We control the green coffee with physical and sensory analysis before loading, after unloading and upon arrival at the company. This allows us to ensure the consistent quality of the product with absolute strictness.

Complete traceability

To ensure the highest quality, our production process provides for total traceability of the elements involved: from the time of a production lot we can trace every single component of the finished product.

In the hands of the master coffee roaster

Roasting is the most delicate and important process in coffee production. It is during this phase that our master roasters apply all their skills in preparing the blends, backed by the most advanced technology available and in full respect for the best Italian espresso tradition.

Oxygen? Constant zero

Thanks to treatment with nitrogen, a gas totally harmless for human health, the coffee is always in a protective and controlled atmosphere, from the storage silos to its packaging in capsules. Our production line is able to ensure an oxygen content of less than 1% in the capsule, up to its complete disappearance in just one week. Many other capsules sold on the market have oxygen levels ranging from 1% to as much as 20%.

Experts at work 24h

We have professionals engaged 24h in controls on the productions in progress. We also have an internal team of 8 trained and SCAE (Specialty Coffee Association of Europe) certified operators who follow all the blend development processes.

Shelf life of 18 months

The particular structure of our compatible capsules ensures a real barrier for the product, protecting and preserving the aroma and taste for up to eighteen months, whereas the plastic body of the capsule and the aluminium film do not allow the use of additional external packaging.

Customized grinding

To ensure maximum compliance with the standards required by customers and excellent quality in the cup, our grinding is done with latest-generation machines, with constant control of the grind curve and dispensing flow.

Total compatibility

Thanks to tests on dispensing in the cup, we can observe that our compatible capsules have an extraction equal to the original. Every single capsule is qualified in terms of components as well as result in the cup, for use in all coffee machines available on the market.

Nespresso®* compatible capsules

*NESPRESSO® is a trademark of Société des Produits Nestlé S.A. registered in Italy and other countries. Caffitaly System S.p.A. is an independent producer not related, directly or indirectly, to Société des Produits Nestlé S.A. Available blends

SOAVE

Pure Arabica espresso, with the full-bodied taste of Central-South American coffee, offering a pleasant and well-balanced rich flavour.

VIVACE

Blend of South American Arabica with a lively hint of Indian Robusta to complement its tone and personality. Offers a well-rounded and velvety taste.

DECISO

Blend of Asian Robusta, which has a strong and distinct character, softened with Arabica to enhance its aromatic qualities.

DECA

A smooth, full-bodied decaffeinated espresso that preserves the aroma of the coffee, with low caffeine content never exceeding 0.1%.

ROBUSTO

An espresso with a rich flavour and excellent body with notes of bittersweet cocoa and dark chocolate.
